

## **DYSBIOSIS – Helpful Herbal Support**

Dysbiosis means a disturbance of the balance of intestinal flora (bacteria). There are over 500 types of bacteria growing in the intestines. Dysbiosis is one of the most all-consuming problems in the U.S. today. It is a central part of most health complaints. If the bacteria are out of balance, this can lead to many health problems (most notably cancer, which has been academically documented.)

PRL's Tablets of pre-flowering Artemisia leaf tips, U.D.G.™ (full spectrum alkaloids from WOOD and bark of Cat's Claw vine), BioTox Elim™, General Formula, MycoNil™ (containing natural anti-fungal compounds), and green hull concentrate of Black Walnut are part of a protocol to balance intestinal flora. More information on the wide-reaching properties of Uncaria tomentosa (Cat's Claw) can be found in Dr. Davis' 4-pg. article which summarizes his seminal Cat's Claw research.

U.D.G.™ is an immunomodulator and is anti-microbial, anti-dysbiotic, and anti-inflammatory. It is not an anti-parasitic. It is also wide-acting for a variety of female problems. It is especially useful for those who are mentally locked into their health problems, for which products such as acidophilus don't work. U.D.G. has a profound ability to unblock such patterns. It is often useful to cycle the products mentioned in the above paragraph.

When the bowel is not working properly, waste is not removed from the blood and the blood then poisons the liver, the kidneys and spleen. Oregon Grape Root cleanses the liver, kidneys, and "gut," and supports them. It supports the kidney ENERGY, not just the organ itself. When the kidney energy goes down, people have back pain, so this is especially useful to chiropractors who are always treating back pain. ( A great combination is Oregon Grape root with Elecampane root (Inula/Berberis Compound.) Culver's Root is a great non-gripping mild laxative that increases bile ejection (ridding the body of many toxins.) Don't forget to check for use of VaporNil™ (Eupatorium extract) to support kidney energy and protect "energetics" of the kidneys from the damage of volatile solvents, plasticizers, new carpet and paint. SpiroNil™ often is of great help in strengthening ligament weakness associated with Lyme disease. Biotox Elim™ should often be used following SprioNil™.
